ABOUT

Full-stack developer with experience across the entire development lifecycle. From building and shipping production-ready features to self-hosting and deploying modern web app. I've worked with a range of state and local agencies to help modernize their systems, with everything from Blazor/ASP.NET modernization efforts to full on content management systems. I enjoy building clean, maintainable, and well-documented systems that last for years to come.

PROFESSIONAL EXPERIENCE

STATE OF ALABAMA | Montgomery, AL | 2021-Present

SOFTWARE DEVELOPER II (Local Government Health Insurance Board) - Feb 2026 to Present

- Delivered production-ready contributions within the first 4 weeks of hire by migrating EF Core models to a new database provider and refactoring the codebase, reducing technical debt and improving long-term maintainability across the team.
- Led research and scoping of a digital signature system designed to reduce client onboarding time by around 30%, producing a technical proposal that is now staged for backlog prioritization.
- Conducted a HIPAA authentication review and evaluated identity solution options, producing a recommendation report to guide the team in unifying their identity provider and authentication systems.

SOFTWARE DEVELOPER (State Law Enforcement) - Jun 2023 to Feb 2026

- Modernized 7+ legacy applications by migrating from ASP.NET Web Forms and Windows Forms to Blazor SSR and the latest .NET, reducing maintenance overhead and significantly improving end-user experience.
- Architected and built an internal social alerting platform for law enforcement personnel and outposts with Blazor SSR, reducing the average page load times by almost 75%.
- Engineered a cross-server database sync system to replicate tables between internal and external data servers, improving data redundancy and reducing manual intervention from the dev team by an estimated 20%.
- Designed and delivered Power BI dashboards with live reporting capabilities, replacing manual Excel-based tracking and saving management approximately 10+ hours per month in reporting overhead.

SYSTEM ADMINISTRATOR (State Medicaid) - Aug 2021 to Jun 2023

- Managed day-to-day IT operations including user access provisioning, password resets, and sFTP workflow modifications within GoAnywhere, maintaining consistent SLA response times across the department.

- Consolidated and migrated sFTP processes to a modernized GoAnywhere instance, streamlining workflow maintenance and reducing configuration complexity by centralizing process management.
- Developed PowerShell scripts to automate environment data collection and server configuration tasks (including pagefile updates across multiple servers) cutting manual administrative effort by an estimated 1-2 hours per week.

TECHNICAL SKILLS

Languages: TypeScript/JavaScript, C#, SQL

Frameworks: React, NextJS, NestJS, Drizzle ORM, Blazor, ASP.Net Core, Tailwind CSS

Infrastructure/DevOps: Docker, Proxmox, GitHub Actions, OPNsense, HAProxy

Tools: Zed, Figma, Postman, SSMS, Visual Studio

EDUCATION

WESTERN GOVERNORS UNIVERSITY | M.S. in Cyber Security and Information Assurance

Salt Lake City, Utah | 2022

WESTERN GOVERNORS UNIVERSITY | B.S. in Cyber Security and Information Assurance

Salt Lake City, Utah | 2021
