ABOUT

Full-Stack Software Engineer with experience building and modernizing systems for agencies, specializing in security-first development across C#/.NET and TypeScript/Node. I've helped lead system-wide code migrations, designed HIPAA-compliant authentication flows, and built production security tooling from scratch, including a self-hosted identity provider with JWT, TOTP 2FA, and RBAC. I am skilled across the full stack, from API design and database architecture to application deployment and UI design.

PROFESSIONAL EXPERIENCE

STATE OF ALABAMA | MONTGOMERY, AL | 2021-PRESENT

SOFTWARE DEVELOPER II (Local Government Health Insurance Board) - Feb 2026 to Present

- Designed a custom digital signature system to streamline online registration, contributing to a 200% increase in completed registrations
- Audited existing authentication systems and architected a HIPAA-compliant authentication flow to close identified compliance gaps

SOFTWARE DEVELOPER (State Law Enforcement) - Jun 2023 to Feb 2026

- Modernized 8+ legacy applications by migrating from ASP.NET Web Forms and Windows Forms to Blazor Server-rendered apps on .NET Core, reducing maintenance overhead and improving usability
- Reduced average page load times by ~1.5x on an internal platform used by law enforcement personnel
- Hardened and maintained a cross-server database sync system replicating data between internal and external servers, improving security posture and data redundancy

SYSTEM ADMINISTRATOR (Medicaid Agency) - Aug 2021 to Jun 2023

- Managed day-to-day IT operations including user access provisioning, password resets, and sFTP workflow modifications within GoAnywhere, maintaining consistent SLA response times across the department.
- Consolidated and migrated sFTP processes to a modernized GoAnywhere instance, streamlining workflow maintenance and reducing configuration complexity by centralizing process management.

PROJECTS

AUTHENTICATION/IDENTITY API (REST/EXPRESSJS/TYPESCRIPT/NEXTJS)

<https://github.com/TayLabs/Auth>

- A self-hosted authentication micro-service built from scratch. Implemented JWT session management, TOTP 2FA, AES-256-GCM encrypted for sensitive data, and a cross-service RBAC system
- Used TypeScript with Zod for request validation and compile time type-safety, catching invalid requests before they were processed

TECHNICAL SKILLS

Languages: C#, TypeScript/JavaScript, HTML/CSS, SQL

Frameworks: React, .Net API with EF Core, NextJS, Node with Express JS

Infrastructure/DevOps: Docker, Postgres, Redis, GitHub Actions, Nginx

EDUCATION

WESTERN GOVERNORS UNIVERSITY | M.S. in Cyber Security and Information Assurance

Salt Lake City, Utah | 2022

WESTERN GOVERNORS UNIVERSITY | B.S. in Cyber Security and Information Assurance

Salt Lake City, Utah | 2021
